

Becoming citizen of the world

Sustainable consciousness

comes from the heart. We see the world as we feel it, which is why it is so important to be mindful of ourselves and responsible for our own actions and behavior before committing to others and the planet.

Strengthen sustainability

81% of plastic waste

is being produced in Asia. But they mainly produce for the market worldwide and outside Asia.

Appreciating the diversity of our earth

Oceania, surrounded by water, has only

2.5% water resources.

In Europe, the figure is **15.5%**.

Although the figure is higher here, water scarcity will be a growing issue in Europe as well, not least because of the climate crisis.

Engagement & Commitment

80% of the waste

enters the ocean via rivers and lakes.

20% of the waste

enters the ocean as waste from ships.

**YOU
Care**

A project between the twin cities Kiel and Gdynia that focuses on the importance of the oceans, lakes and seas. **Young people** from Poland and Germany deal with the topic of "life below water" critically, personally and creatively. Together we draw attention to the topicality of the issue, learn about the central importance of our seas for coastal cities and develop our own ideas and solution strategies.
