

# TeDiCom

## Teaching Digital Competences in Adult Education

Project Number: 2019-1-DE02-KA204-006083 • Project Duration: 01/09/2019 - 30/06/2021

### OBJECTIVES

TeDiCom is an European project funded by the Erasmus+ program of the EU. It deals with the transfer of digital competences. It strives to increase the resilience of democratic European societies to resist fake news campaigns, hate speech on the internet as well as automated bot campaigns, so that these can be detected at an early stage and have no influence on the formation of opinion in European society.

It does so by empowering adult activists to have a better understanding of digital media and its risks and opportunities.

### IMPACT

TeDiCom will help educators to conceptualise their existing training activities, evaluate and focus their impact to make them more relevant for the learners, more transferable for other educators and more useful for society.

### TARGET GROUP

**Teachers and professionals in adult education dealing with adults activists**, who have a message that they want to spread and who are active users of social media.

### OUTPUTS

- 1. Handbook of best practices**, published on the website of the participating organisations and made available to the interested audience as free licenced.
- 2. Project website**, to disseminate the innovative teacher training method.
- 3. Blog: Digital competences in times of Corona**, insight into the work of institutions from the field of adult education during the pandemic.
- 4. Teacher training activity**, to which further professionals from adult education will be invited to test and evaluate the practical applicability and relevance of our training concept.
